Abstract

According to the present invention, a composition is provided including honey and raw food fibers. The composition's primary use is to relieve occasional heartburn and digestive disorders including GERD and stomach and intestine complaints. Further, the composition of the present invention may be processed into a compressed product. Among the many advantages of the composition of the present invention are that the composition normalizes the defective physiology of the digestion; the composition achieves the desired therapeutic effect quickly; and the composition is provided as a natural product without adverse side effects found with typical pharmaceutical products.
